

Docket No. AUS920010056US1

ABSTRACT OF THE DISCLOSURE

**METHOD AND APPARATUS FOR DELIVERY OF EXTERNAL DATA FROM A
CENTRALIZED REPOSITORY IN A NETWORK DATA PROCESSING
SYSTEMS**

- 5 A method, apparatus, and computer implemented
instructions for processing data. A markup language data
file describing an object is read. The data in the file
is translated into a database representation. The
database representation is stored in a database. In
10 response to receiving a request from a requestor, the
database is queried. In response to receiving a result,
the result is translated into the object, and the object
is sent to the requestor.
